

Medicare penalizes hospitals with high rates of potentially avoidable mistakes - "hospital-acquired conditions" - and Medicare payments are reduced 1 percent over a fiscal year.

| <b>To determine penalties, Medicare ranked hospitals on a score of 1 to 10 for three types of HACs:</b>       |                  |                                    |                     |                    |                        |                |
|---------------------------------------------------------------------------------------------------------------|------------------|------------------------------------|---------------------|--------------------|------------------------|----------------|
| <b>* Central-line associated bloodstream infections, or CLABSIs;</b>                                          |                  |                                    |                     |                    |                        |                |
| <b>* Catheter-associated urinary tract infections, or CAUTIs;</b>                                             |                  |                                    |                     |                    |                        |                |
| <b>* Serious complications, based on eight types of injuries, including blood clots, bed sores and falls.</b> |                  |                                    |                     |                    |                        |                |
