

IT SPECIALIST In the Ames Office

Iowa Public Radio is looking for an Information Technology professional to join our Operations team as an IT Specialist. This individual, employed through Iowa State University, will directly support the continuing operations and advancement of Iowa Public Radio and its member stations through maintaining our technological infrastructure across multiple offices and users. Specific responsibilities for this position include supporting all aspects of computer-based technology and networking for Iowa Public Radio. This includes maintaining and replacing end-user and server related equipment, networking, and other peripheral gear, supporting the security and integrity of the organization's data and systems, and supporting users with technological workflow suggestions and improvements. Additionally, this position will provide support to the technology-based broadcast and fundraising systems for the organization. This position may also occasionally write programming scripts to automate certain department processes within the organization.

SALARY RANGE:

- \$38,713 - \$67,746

QUALIFICATIONS:

- Degree in computer science or IT related field(s);
- Experience in supporting and maintaining Microsoft user services, including Active Directory and Office 365;
- Experience in supporting firewall and other networking systems, including both software and peripheral hardware;
- Experience in completing hardware and software maintenance and repair through both centralized and manual processes; and
- Experience in implementing and supporting open-source and purchased software solutions.

APPLICATION PROCESS:

For complete application instructions, requirements, and employment requirements, visit Iowa State University's open positions site: <https://www.iastatejobs.com/postings/24145>. For guaranteed consideration, application materials must be submitted by **February 19, 2017**.

Iowa Public Radio is an Equal Opportunity Employer.
