<i>We ran the following program to address it</i> (Title): KENW Regional News (with KENW News Director Janet Lyn)

TYPE A BRIEF DESCRIPTION OF PROGRAM (Format, participants, content, etc.): In-depth interview with New Mexico State Senator Stuart Ingle, who also serves as the state Senate Minority Leader, about the state of New Mexico's failure to comply with federal REAL ID Act regulations because New Mexico was issuing drivers' licenses to immigrants who are in the United States illegally. Legal citizens of the United States were being required to show valid U.S. passports and birth certificates to prove citizenship because of the problem with New Mexico drivers' licenses. NM State Sen. Ingle discussed his plans during the 30-day session of the 2016 New Mexico Legislature to sponsor and introduce a compromise, bipartisan bill that would bring the state of New Mexico into compliance with federal REAL ID Act regulations. The compromise would still allow illegal immigrants a means to obtain a driver's permit card for driving in New Mexico, while ensuring that legal New Mexico/U.S. residents could obtain and use New Mexico drivers' licenses as valid ID.

TYPE A BRIEF DESCRIPTION OF PROGRAM (Format, participants, content, etc.): In-depth interview with U.S. Rep. Steve Pearce, R-N.M., who serves New Mexico's 2 <sup>nd</sup> Congressional District in southern and southeastern New Mexico, about the continuing issues in the region concerning the 2-year closure of the troubled Waste Isolation Pilot Plant near Carlsbad, N.M., the nation's only underground nuclear waste storage facility. The WIPP site has remained closed since February 2014, when there was a radiation leak there that contaminated workers. Congressman Pearce talked about ongoing efforts to make sure the WIPP site is safe and can possibly reopen by the end of 2016. Pearce also discussed efforts to speed up needed repairs to the two main elevators at Carlsbad Caverns National Park after they had to shut down several months ago. That rendered the steep underground caverns, a popular national tourism site, inaccessible except by foot, which has also caused economic loss in southeastern New Mexico. Pearce said the National Park Service is now trying to get the elevators safely repaired and back in operation at Carlsbad Caverns in New Mexico by the Memorial Day weekend in May of 2016.
