

In the weeks following the interview I had set up an interview with a Texas Ranger in McClennan County Texas who is a certified forensic hypnotist, it was set in that county because that is where Mrs. Gager currently resides. However, Mrs. Gager was not cooperative in that matter stating that this type of tool was only used as a "last ditch effort". I explained that after twenty years, no physical evidence, and no actual crime scene to review this was where the investigation had lead and would appreciate her cooperation. The next contact from Mrs. Gager indicated that she had been diagnosed with depression and on medication for the depression, subsequently I didn't pursue the forensic hypnosis any further knowing that this diagnosis and medication eliminated her as a candidate.
