Attorney Jamie White represents 34 Survivors of Larry Nassar's Abuse in civil litigation.

Although the allegations against Dr. Strampel are extremely troubling, I cannot say they are surprising given the atrocities that the women I represent have endured at the hands of Larry Nassar. Many of these women could have been spared if the University had taken the appropriate, common sense actions when notified of Larry Nassar's ongoings in the late 1990s. The University has been grossly negligent in its investigation of these matters. We pleaded privately and publicly for an independent investigation in February of 2017 those requests fell on deaf ears until the entire country was exposed to this disaster through the victim impact statements of more than 250 women. We will never know how much evidence has been lost, tampered with, and destroyed over the course of the last several years. But, based on the complaint issued against Dr. Strampel, it appears that attempts to conceal and or delete evidence continued up until very recently. I applaud the task force for their diligent efforts.
