RE: New England Clean Energy Request for Proposals

Dear Mr. Waltman,

On behalf of Deepwater Wind, LLC, we are pleased to submit the enclosed proposal for the sale of energy and RECs from the Simsbury Solar Farm – a utility-scale solar development located in Simsbury, CT – in response to the subject RFP.

When constructed, the Simsbury Solar Farm will be the largest solar energy facility in New England, and will demonstrate the large-scaled clean energy resources can provide clean energy cost-effectively to southern New England without controversy. The Project will yield a number of other unique benefits:

- Energy Delivered Directly into southern New England
- Reduced Local Air Pollution Emissions
- Lower Wholesale Energy Market Costs, resulting from wholesale market price suppression

Per the RFP instructions, we are submitting two separate CDs for each the proposal – one that includes confidential information and one from which all confidential information has been redacted. Please note that in the confidential version, certain data contained in pages 3-4, 6, 10, 14-15, 17, 21-22, 25, 33, 36, 39, 42, 45, 48 as well as the Appendices 1-1, 3-1, 4-2, 5-2, 5-3, 5-4, 6-3 and 15-1, and marked with a double blue underline, have been submitted in confidence and contain trade secrets and commercial or financial information which is of a privileged or confidential nature. DWW requests confidential treatment of such parts of the Proposal under the Massachusetts Public Records Law, the Rhode Island Public Records Act and the Connecticut Freedom of Information Act.

Our designated contact for this RFP is Dylan Levings. Please do not hesitate in contacting him at (516) 314-6062.

Best regards,

Jeffrey M. Grybowski
