Community Assembly Presentation: Mapping Lead Toxicity in Milwaukee

We are a coalition of citizens and community organizations that are fighting for the removal of toxic lead infrastructure in our Milwaukee communities. We are calling on the larger Milwaukee community to come to an assembly to discuss and strategize for the future of our city's infrastructure and for clean, lead-free water which we believe should be a resource available to all. The Milwaukee Community is encouraged to attend this assembly to build direct democratic community power and to rid the city of toxic lead. At this Community Assembly we will be presenting GIS mapping discoveries that were made by a member of our Coalition. ***Please join us!***

Saturday 9/29 2:00pm-4:00pm
