

Curiosity Guide #201

Vision

Accompanies Curious Crew, Season 2, Episode 1 (#201)

Hole in my Hand

Investigation # 10

Description

Hide your hand behind your back and tell your parents you have a hole in your hand. After they calm down, show them how they can have one, too!

Materials

- Rolled up piece of paper

Procedure

- 1) Roll up a sheet of paper so that it has a round opening of about $\frac{1}{2}$ inch in diameter.
- 2) Hold it in your right hand, in the space where the base of your thumb and pointer finger touch.
- 3) Hold your left hand, palm toward you, about 8 inches in front of your face. The side of your hand will be close to or touching the tube.
- 4) With both eyes open, look through the tube with your right eye. Look at your hand with your left eye.
- 5) Can you see the "hole" in your hand?
- 6) Move your left hand closer to your face and angle the paper tube a bit. Does it make the hole look even more centered in your hand?

My Results

Explanation

Each eye is picking up a different image as they always do, and your brain is putting the images together, like it always does. However, these two images don't belong together!
